

## 铰链 · stainless steel, elongated on one side

25162.0090

## 产品描述

These hinges from stainless steel are characterised by the compact design. The hinge pins are form-fit pressed and are therefore suitable for use in case of strong vibrations and shocks. Appropriate friction pairings of the hinge components and the lubrication reduce abrasion to a minimum. The version with centering steps avoids lateral slipping under high loads and thus protects the fixing screws from unacceptable lateral forces.
