

Spring Plungers • with internal hexagon and seal

22060.0152

Product Description

Spring plungers can be used for locating or for applying pressure, as a detent or for ejection. By means of the seal, liquid cannot penetrate into the spring plunger.

Material

Pin

- Free cutting steel, hardened, blackened

Seal

- NBR

Body

- Free cutting steel, blackened

Spring

- Stainless steel

Assembly

Spring plungers can be mounted and removed by means of the slot or internal hexagon. Please use a special assembly tool for mounting with a slot (pin side).

Characteristic

Heavy spring load: marked with two lines

Standard spring load

Heavy spring load

More information

Notes

Special types on request.

Spring plungers are specially tested for spring range and forces.

References

Compared to EH 22060., i.e. "no seal", there are deviations in dimension l, spring load and temperature range.

Thread lock on request, please refer to appendix - Technical Data -
