

## Centering Clamping Elements • with clamping segments

23340.0030

### Product Description

For clamping and centering of workpieces with internal bore. Exact self centering with a precision of  $\pm 0,025$  mm. Due to the clamping segments being ground, workpieces with raw and/or machined surfaces can be frictionally connected, centered and held down at the seats. Large adjustment stroke and a low building height are a feature of the centering clamping element. **Mounting from either top or bottom.**

### Material

#### Body

- Tool steel, hardened, blackened

#### Spring

- Stainless steel

#### Clamping segments

- Stainless steel 1.4112, hardened and ground

### Assembly

Assembly instruction for mounting from above:  
Remove clamping plate and screw. Screw in threaded pin from below, and tighten from above using female WS<sub>2</sub>.  
Further or detailed information can be found in the assembly and operating instructions.

### Application example

### Compliance

#### RoHS compliant

Compliant according to Directive 2011/65/EU and Directive 2015/863.

#### Does not contain SVHC substances

No SVHC substances with more than 0.1% w/w contained - SVHC list [REACH] as of 23.01.2024.

#### Does not contain Proposition 65 substances

No Proposition 65 substances included.
