Tapered Shaft Hubs • without lock nut

25050.0009

Product Description

By using tapered shaft hubs, all shaft-hub joints of machine elements such as sprocket wheels, gear wheels, belt pulleys, cams, levers etc. can be easily and efficiently established. It is a self-centering and non-floating tapered shaft hub in corrosion-protected design with a hexagon nut.

The rotational accuracy of the tapered shaft hubs is 0,03 mm.

Material

External part

• Steel, zinc-plated by galvanization

Inner part

Steel, nickel-plated

Nut

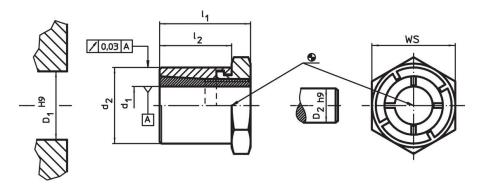

· Steel, nickel-plated

More information

References

Comply with mounting instructions, mounting examples, and technical data.
