SIMPLEX reinforced cast iron housing 3711.040

Product Description

Thanks to its enlarged wall thicknesses and struts, the reinforced SIMPLEX cast iron housing (series 3711) provides for the great stability that is needed, especially during tasks that are completed with the SIMPLEX copper inserts. The increase in weight ensures greater impact force. It comes with an integrated handle protection sleeve, protecting the handle in case of mis-strikes. Robust and dampening vibrations, the housing is very durable and offers excellent break resistance - not least thanks to its wear-resistant powder coating. This black housing is available for SIMPLEX soft-face mallets with sizes ranging from D30mm to D80mm. Only fibre-glass handles may be installed into reinforced cast iron housings!

- Reinforced SIMPLEX cast iron housing (black)
- · Thicker walls and struts
- · Great stability
- · Also suitable for use with SIMPLEX copper inserts
- · With integrated handle protection sleeve
- Excellent break resistance
- No chipping
- Vibration-dampeningWith wear-resistant powder coating
- Very durable
- Available for SIMPLEX soft-face mallets with D30mm to D80mm
- · Only fibre-glass handles may be installed into reinforced cast iron housings!

Material

Housing

Reinforced cast iron, black

Assembly

Only fibre-glass handles are allowed to be mounted in the reinforced cast iron housing!

More information

Notes

Including screw, nut and spring washer.
