RoHS – Conformity with directive 2011/65/EU and directive 2015/863

We are a metal-working company. Our product range covers Standard Parts, Hand Tools, Work-holding Solutions and Aviation Products. Our products are supplied to customers in almost all industries worldwide.

The compliance and the application of the RoHS Directive are an integral part for the continuous improvement of our quality management system.

For the most part our products comply with the RoHS-Directive 2011/65/EU and the extension 2015/863/EU or comply under exemption 6a / 6b /6c.

Some of our products contain lead in a concentration, which is not covered by the exemption 6a / 6b /6c. On our website under the menu [„Company“](#) / [„Quality & Environment“](#) you can find an overview of all relevant articles, as well as at article level in the tab “compliance”.

These statements are based on our current knowledge and experience. Our products are regularly checked in accordance with the RoHS Directive and, if necessary, adapted to changing requirements.
