# **Screw Jacks**

# 23470.0030

# **Product Description**

Trapezoidal self-locking thread, spindle with final safety device. The holders, which can be secured by means of the T-slots, make it possible to tighten the jacks so that they will not slip out of position when a workpiece is changed. They also allow to fit screw jacks to vertical clamping surfaces. Screw jacks are frequently used for supporting workpieces. Use of the self-aligning cap ensures a correctly aligned bearing surface. Using the centering plate as an intermediate element, it is possible to fit a number of screw jacks sizes 52, 70 and 100 together one above the other.

# Material

#### Caps

· Steel, case-hardened, blackened

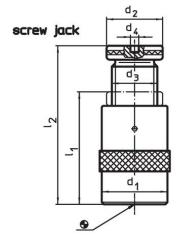

#### Holders

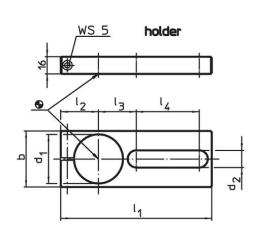

· Steel, blackened

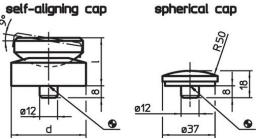

#### **Screw Jacks**

· Steel 1.0503 varnished
