

SIMPLEX soft-face mallets • Rubber composition, with "Stand-Up" / Soft metal; with cast iron housing and high-quality extra short wooden handle

3029.282

Product Description

This SIMPLEX soft-face mallet comes with an extra short handle. The compact design keeps the end of the handle from hitting the ground.

The SIMPLEX series 3029 comprises the insert combination of rubber composition / soft metal. Boasting an ingenious shape, the rubber insert with "stand-up" (3202.260) allows the hammer to stand securely on its head and reduces the need to bend over, making it possible to work in a much more ergonomic and back-friendly manner. Ultra low-wear, impact cushioning and odourless, the proven rubber blend offers a much longer service life than a conventional rubber hammer.

Made of aluminium, the silver soft metal insert (series 3209) is hard, heat-resistant and a replacement for a classic lead hammer.

Made of cast iron, the housing comes with an integrated handle protection sleeve that provides for a high level of break resistance.

Damping vibrations and shaped ergonomically, the high-quality and extra short wooden handle has a double coat of varnish in the grip area and is thus resistant to dirt.

In line with the smart SIMPLEX principle, all components are replaceable and can be retrofitted. This translates to savings in both money and resources.

Product features:

- The rubber insert with "stand-up" (3202.2) ensures back-friendly working and reduces the need to bend over.
- SIMPLEX soft-face mallet D80mm with the insert combination of rubber composition with "stand-up" (black, medium hard, impact cushioning, odourless, low-wear) / soft metal (silver, hard, heat-resistant).
- Housing made of cast iron with an integrated handle protection sleeve and high break resistance.
- Extra short handle, end of handle not hitting the ground.
- High-quality, vibration-damping, and ergonomically shaped wooden handle; grip area with double coat of varnish (resistant to dirt).
- All parts can be replaced / retrofitted, resulting in great savings in cost and resources.
- The soft metal insert is made of aluminium and replaces conventional lead hammers.

Application Areas

Mould construction, plant construction, assembly and repair work in the automotive and truck sector

Material

Handle

- Wood

insert 1

- Rubber composition, black, with "Stand Up"
- Medium hard
- impact cushioning
- Odorless
- Low-wear

insert 2

- Soft metal, silver
- hard
- Heat-resistant

Housing

- Cast iron
